WATER CONSERVATION TIP

According to the USEPA, 50 % of residential outdoor water use is wasted, in part, due to overwatering. Here are some simple things we all can do to prevent wasting water:

STEP ON IT: Step on the lawn: If the grass springs back, it doesn't need water.

LEAVE IT LONG: Longer grass promotes a more drought-resistant lawn, reduced evaporation and fewer weeds.

REPLACE IT: Turf grass requires much more water and provides fewer environmental benefits, than native plants and flowers. Consider replacing a hard-to-water corner of your yard with native plants—You'll help save water and help out birds and beneficial insects, too!
